# Welcome to our Deck

We are a design team from Kennesaw, GA with a passion for pushing boundaries. At CEG we try to bring new elements and a different perspective on Special Effects to add the biggest impact to your stage

# Creating Emotion

**Special Effects is more than just a passion for us. As someone who was huge into concerts/festivals growing up, I have a different respect for events & special effects.**

**We do so much more than play with fire and throw bits of paper everywhere, we create memories, experiences, and bring new emotions into people.**

**THIS what sets aside from other SFX teams.**

# Artist Collaboration

**We work with artists one on one to bring the most to their performance. whether its on the fly or for timecoded sets, Our design team brings a personalized aspect to each show.**

# **Safety Is Our Priority**

**From Fireworks to Flame effects, we pride ourselves on upholding strict standards to keep everyone safe, from our artists to our patrons.**

**Our team has a set safety standard & protocol that follows both industry standards & effect-specific guidelines that work to keep everyone safe.**

**Our team also uses frequency specific radios to stay in contact during shows.**

**This way we always stay in direct communication with our SFX Operator, fire watch, as well as show management.**
