Welcome to our deck

We are a design team From Kennesaw, GA that specializes in crafting dynamic lighting displays that transform indoor & outdoor environments into captivating landscapes.

Over the past 2 years, we have spent time building a passion for painting treetop canopies and developing the most vibrant LED Products on the market.

From our CP320 Full spectrum LED Par to our Lumiscapes LED Reels, all of our products are designed to bring the most out of your environment and create a memorable display.

Lumiscapes

Programmed Lighting Displays

Adding Live Programming to an area can add movement and bring a tree-top canopy to life

The Lumiscapes CP320 RGBWA-UV Par is a custom LED fixture that powers ALL of our designs.

It features a powerful 320-watt multi-color full spectrum driver that is able to move light through landscapes and provide a vibrant wash, creating a ceiling of light.

Lumiscapes

Static & Wireless Lighting

Up-Lighting is a quick and easy way to bring color to an area and offers multiple solutions for both indoor and outdoor applications.

Wireless lights such as our “W100 RGBWA” Fixtures are great for temporary accents in unique settings.

These lights are ideal for Ballrooms, Outdoor dining areas, dance floors, landscape feature applications and any area where cables are an eyesore.

For larger areas our “CP” Fixture line is our light of choice for any static application. Our CP270 is versatile spot wash that is great at any throw distance while our CP320 is our powerhouse wash light that we feature in our larger displays

User Friendly Control

Stand-alone Systems -

Our fixtures feature a wide array of pre-programmed color options covering the full LED spectrum, eliminating the need for external controllers. Once we've set your signature color scheme, you're all set! Simply flip the switch to turn them on.

Interactive Control Systems -

Additionally, all fixtures are programmable using a DMX controller, allowing you to switch between multiple preset color modes switching between everyday & holiday modes with just the push of a button. This unlocks the full potential of your display and can be set to move on its own through a sequence or, as a timecode program to a specific song or section of time.

Lumiscapes

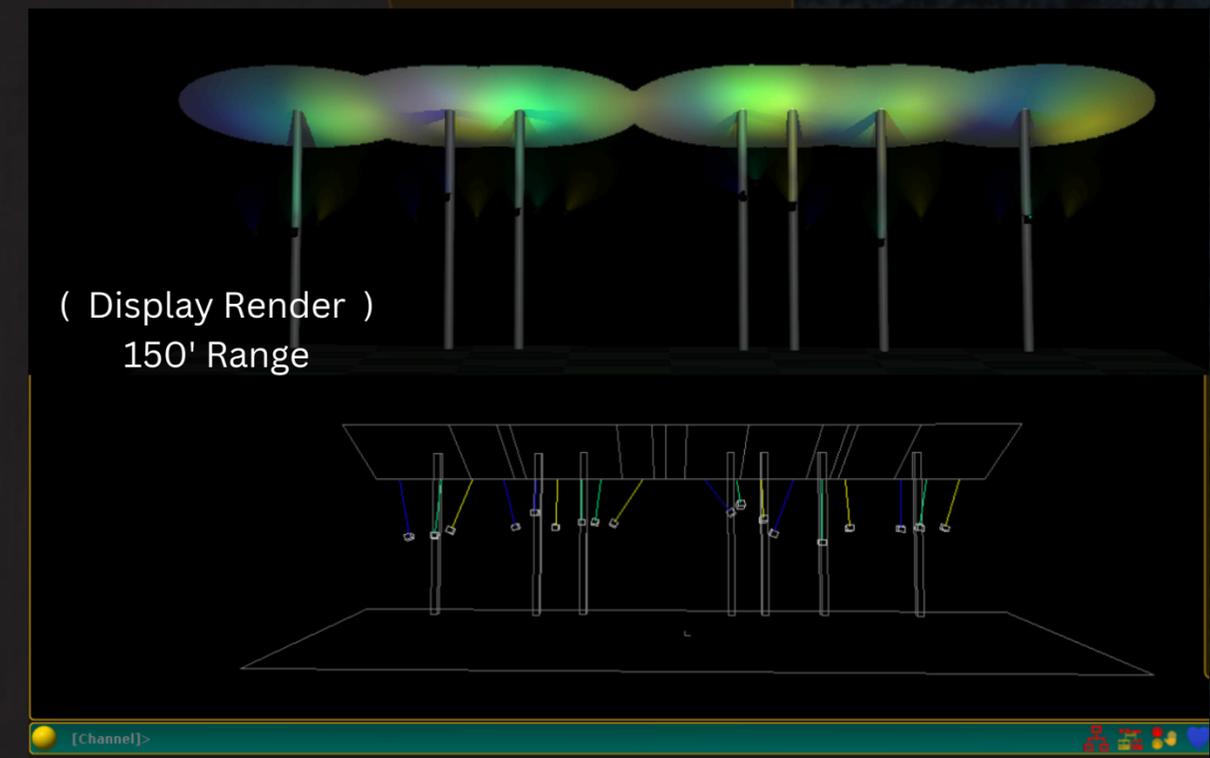

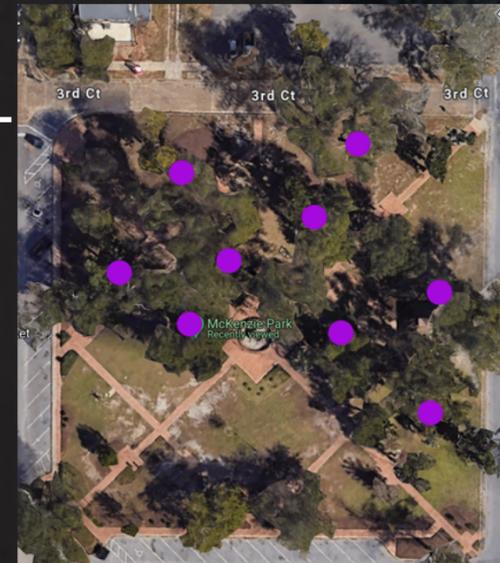

Installations & Design

For outdoor installations, our design team utilizes satellite-linked software to map out accurate display dimensions, cable paths, and power distribution areas.

3D RENDER -

We work closely with you every step of the way, providing not only 3D display renders but also scaled maps of the proposed display areas.

Our lighting software allows us to accurately map out the throw scale, fixture positions & your color schemes ensuring that everyone is on the same page from the start of the design process through to the installation date.

Mounting Harness Options

For Permanent displays there are Two types of mounting options we can use depending on what you prefer.

Type One, is a Bolted Stainless Steel anchor system which we use to hold the lighting harness in place on the tree. This does require us to bore into the tree 2.5 Inches however, this is the most permanent mounting solution

Type Two, is a locking strap solution that straddles the tree and supports the lighting harness. This method uses a burlap fabric in-between the straps and the tree to prevent any damage to the branch.

This however does requires a yearly maintenance to reset the burlap and re-lock the straps.

Product Guarantee & Insurance

Standard Product Guarantee

We proudly offer a guarantee for all our products, ensuring they function effectively for a total of 50,000 hours of LED use. This guarantee is included as part of our service fees, as a commitment to our quality and products performance.

Extended Insurance & Yearly Maintenance

In addition to our standard guarantee, we offer an extended insurance and maintenance plan for an additional 11% of the total cost of the product.

This plan includes:

- Coverage Period: **3 years from the date of purchase.**
- Comprehensive Coverage: This insurance guarantees that if you encounter any issues with the display, we will provide a replacement or necessary repairs within 7 days of receiving your claim. **The coverage has no limits during the 3-year period.**
- Included Services: Our insurance and maintenance plan covers a wide range of services, including:
 - Changes to the color program
 - Repairs or replacements of fixtures, control consoles, and networking components
- **Annual Checkup: A yearly inspection of the system will be conducted to identify and address any potential issues proactively.**

Production Support Packages

Lumiscapes Lighting is a direct partner to our parent company Caliber Event Group.

At CEG we provide production resources such as Staging & hardware solutions, LED Panels, Professional stage lighting, Special Effects, as well as Engineering, Design & Logistics

This makes Lumiscapes & Caliber Event Group a turn key production powerhouse
